KEY FEATURES OF THE SUB-FUND			
WHAT ARE YOU INVESTING IN? <ul style="list-style-type: none">• You are investing in an ILP sub-fund that feeds 100% into the Underlying Fund, a collective investment scheme constituted in Luxembourg that aims to provide you with long-term capital growth by investing in global equity markets with a focus on equities which will result in a portfolio of investments with a potential dividend yield above the market average when the portfolio is considered as a whole.			Refer to “The Sub-Fund”, “Distribution Policy” and Schedule 1 of the Underlying Fund’s Prospectus for further information on features of sub-fund.

¹ For ILP sub-funds that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

² In order for units in the ILP sub-fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP sub-fund, and investment approach of the manager have to be stated in the product summary:

(a) to invest only in deposits or other Excluded Investment Products; and

(b) not to engage in securities lending or repurchase transactions for the ILP sub-fund.

The definition of "Excluded Investment Product" can be found in Annex 1 to the Notice on Recommendations on Investment Products [Notice No. FAA-N16] at <https://www.mas.gov.sg/regulation/notices/notice-faa-n16>.

<ul style="list-style-type: none"> You may receive regular distributions at such frequency as may be indicated for the relevant Class. The Managers will decide whether or not to make such distributions (including the amount and source of such distributions i.e. from income, net capital gains and/or capital) and may consider factors such as market conditions, etc. Distributions from, and capital of, the Sub-Fund are therefore not guaranteed. Distributions out of capital will result in a decrease in the NAV of the Sub-Fund. Therefore, you may receive an amount less than your initial investment amount when you redeem your Units. Such distributions may result in reduced future returns to you. Please refer to the Dividend Distribution policy in the Product Summary. 	
Investment Strategy	
<ul style="list-style-type: none"> The Underlying Fund aims to achieve its investment objective by investing in a diversified portfolio of global equities and equity related securities. The Underlying Fund will employ a proprietary rule-based equity selection model to identify attractive international investment opportunities. This systematic research driven approach focuses on seeking equities that can be expected to pay high dividend yields to achieve current income from dividends on such equities. Equity exposure may also be constructed by the use of derivative strategies (e.g. long futures, long call options). For so long as the Units of the Underlying Fund are prescribed capital markets products and EIPs, the Underlying Fund will not invest in any product or engage in any transaction which may cause the Units of the Underlying Fund not to be regarded as prescribed capital markets products or EIPs. The Underlying Fund may be invested in derivatives for hedging and efficient portfolio management purposes. 	<p>Refer to “Use of financial derivative instruments” and Schedule 1 of the of the Underlying Fund’s Prospectus for further information on investment strategy of sub-fund.</p>
